

Subject: Regain Your Brain and Regain Your Life (World Alzheimer's Day)

Dear <First Name>,

Today, I have some exciting news to share with you...

On September 21, 2019, twelve of the nation's leading visionaries in brain science will share with you the research behind protecting your health, restoring your memory, and regaining the brain you had when you were young.

Here's what just a few of the doctors participating in this event have to say:

*"We all sort of accepted the notion that, as we age, our brains will rust and deteriorate and shrink and lose the ability to function... **we now understand that just isn't true.**" – David Perlmutter, MD, Neurologist and New York Times Bestselling Author, Grain Brain*

*"**We know what steals your mind.** Almost all of the risk factors are preventable or treatable." – Daniel Amen, MD, New York Times Bestselling Author and Founder, Amen Clinics*

*"It's a very common disease now. But it should be and it can be with what we know today, **a rare disease.**" – Dale Bredesen, MD, New York Times Bestselling Author, Founding CEO, The Buck Institute for Research on Aging*

This is not fringe science. This is not one person's opinion.

This is a team of 12 doctors, scientists and researchers—the world's leading brain experts—who are actively working to make brain disease and memory loss a thing of the past.

And they're succeeding.

But you don't have to take my word for it.

[Just take a look at this 5-minute preview and see for yourself.](#)

Then sign up to watch the entire 12-day, free online event with my compliments.

Learn how you or someone you love can regain your brain... and regain your life.

Kind regards,

Lee Euler, Producer
Regain Your Brain
