Hi Name,

Today is the day - It's finally time to *Regain Your Brain!*

We are LIVE – WATCH the premiere episode of *Regain Your Brain!*

[Click Here to Watch the Premiere Episode Today](#)

### ***Getting Started: The Master Plan to Reverse Memory Loss & Regain Your Brain***

Today's exciting first episode of *Regain Your Brain* features **Peggy Sarlin**, your host of *Regain Your Brain* and author of *Awakening from Alzheimer's*, and myself, **Lee Euler**, executive producer of *Regain Your Brain*, and the highly acclaimed documentary, *Awakening from Alzheimer's*.

This episode will help you **start your plan for protecting and saving your brain**. You're going to learn the steps to make your brain healthy and young again from some of the leading brain health experts and neuroscientists *in the world!*

Your mind should be just as sharp at 95 as it is at 24. But I'll bet for many of you, that's hard to believe. And yet, that's what Dr. Pamela Wartian Smith told Peggy Sarlin. Dr. Smith is an anti-aging specialist – and she has the evidence-based science to back it up.

**The truth is...** no matter how old you are, no matter if you already have Alzheimer's or any other type of dementia... or if you're just starting to notice a little memory slipping and it bothers you... **your brain can get better. You can recover lost function and come back stronger** than you've been in decades. Yes decades.

And if you're young and healthy right now, you can **boost** your memory and cognitive ability to levels you never thought possible.

Today we know that you are NOT stuck with the brain you have. You can make it better... but **you must have a plan.**

Today is the perfect time to start creating YOUR PLAN to reverse memory loss and **make your brain young again.** The sooner you **get started** the sharper your memory will be!

### **Getting Started: The Master Plan to Reverse Memory Loss & Regain Your Brain**

Don't miss this once-in-a-lifetime opportunity to learn directly from the **pioneers** who are working to make brain disease and memory loss **a thing of the past.** It's a great preview and summary of what's in store over the next 12 days.

We're giving you **24-hour access** to watch all 12 episodes in this online video event. Each morning at 9 a.m., you'll be given a link to watch that day's interview with one of our brain health experts.

Make it a point to schedule time to watch with family and friends because each episode will be taken down the following day.

"See you" there!

Lee Euler

**P.S. SNEAK PEEK:** Tomorrow's episode will feature the **first doctor to successfully reverse Alzheimer's** and other forms of dementia in REAL people.

Subject line: Episode 2: Identifying and reversing the 3 forms of dementia...

Subject line: Individual plan to stop cognitive decline, think sharper (Day 2 is here!!)

Subject line: Regain Your Brain episode 2 now up! (plus link to episode 1 again)

Hi Name,

Yesterday was such an exciting kickoff to *Regain Your Brain*. I heard hugely positive feedback and rave reviews from our viewers... Thank you!

Because so many people got so much out of the Premier Episode, I'm giving you full access to the Premiere Episode during the entire event!

[If you missed the Premiere Episode Click Here to Watch Now](#)

Today for Episode 2 I have a special treat for you...

You're going to meet Dr. Dale Bredesen, M.D., **the *first* doctor to successfully reverse Alzheimer's** and other forms of dementia in REAL people using his unique "Silver Buckshot" protocol.

[Click Here to Watch Episodes 2!](#)

## The “Silver Buckshot” Protocol: Identifying and Reversing the 3 Primary Forms of Dementia

Dr. Bredesen, M.D. was first person to ever publish a peer-reviewed study that proved Alzheimer’s could actually be reversed, and is the author of the groundbreaking new book, ***The End of Alzheimer’s***. Dr. Bredesen is internationally recognized as an expert in the mechanisms of major neurodegenerative diseases such as Alzheimer’s disease.

In this episode, you’ll learn that there are actually 3 different types of dementia, and each one **needs to be treated differently to restore as much function as possible**.

Many who have followed Dr. Bredesen’s groundbreaking protocols have made complete recoveries, or have **restored function *dramatically***, even people who were in later stages of Alzheimer’s.

You don’t have to suffer with memory loss, and you can regain much function even if you’re well into dementia.

If you have memory issues, or you want to increase your brain power and sharpness, watch Episode 2 and discover how to create an **individual plan to stop cognitive decline, and *change your brain* so you can think clearer and remember more**.

Here's just a few of the comments I've received about this online video event:

testimonial goes here.....

testimonial goes here.....

testimonial goes here.....

I encourage you to watch this episode because I think you're going to find Dr. Bredesen's findings extremely valuable.

He's discovered that Alzheimer's is not just one big monolithic disease. Instead, **it's three distinct, separate syndromes, and that matters a lot in terms of how you treat it.**

Because of the shift in WHY we develop memory problems, Dr. Bredesen has seen **unprecedented improvements in the recovery of cognitive function** in many people with pre-Alzheimer's, as well as those with Alzheimer's disease.

And even better news is that some of the people who would have once been it's too late for them, have actually regained remarkable cognitive function on the program.

In this interview, Dr. Bredesen will give you **very practical information** that you can start to deploy right now, whether you or your loved one has already developed Alzheimer's, or just have a little memory loss.

Even if you've got a busy day, it's really important to your future that you make some time to watch this critically important episode with the first doctor to successfully reverse Alzheimer's.

Subject line: Episode 3 now live with America's most popular psychiatrist!

Subject line: Make your brain better even if you've been bad to it (Day 3!)

Hi Name,

Today's *Regain Your Brain* expert is also known as *America's most popular psychiatrist*. Please welcome, Dr. Daniel Amen, world-renowned neuroscientist, 10-time New York Times bestselling author, and founder of The Amen Centers.

[Click Here to Watch Dr. Amen's Episode Now!](#)

**“How to Make Your Brain Better – Even When You've Been Bad to It”**

This is one episode you don't want to miss... especially if you think your brain is in trouble or you haven't exactly been living the **healthiest brain habits** (think junk food, lack of quality sleep, negative thoughts, toxins, smoking, etc).

The health and future of your brain and memory comes down to asking yourself every day one really simple question:

**Is what I'm going to do today good for my brain, or bad for it?**

Let Dr. Amen tell you what is good for your brain and what is bad for it, so you can make the right choices for a healthy brain and thriving memory every day...

[Click Here to Watch Dr. Amen's Episode Now!](#)

**Dr. Amen is one of America's leading brain health experts.** He's written or co-written over 70 professional articles and more than 30 books, including *New York Times* mega-bestseller *Change Your Brain, Change Your Life*. He's appeared on numerous television shows including *Dr. Phil*, *Larry King*, *Dr. Oz*, *The Doctors*, and *The View*.

**With a better brain, everything in your life is better.** Your relationships are better. Your health is better. Your money's better... because you make better decisions.

This is critical information for you to have because today, **75% of older Americans report memory problems**, and once you reach age 85, you have a 50% chance of dementia – *unless you know how to create a great brain health and memory for yourself* – which is exactly what Dr. Amen is going to teach you!

### **“How to Make Your Brain Better – *Even When You’ve Been Bad to It*”**

In this episode, Dr. Amen will tell you:

- An "insanely simple idea" to counteract dementia, which 50% of the older population in the United States is at risk for.
- How to prevent or treat *all of the risk factors* that steal your mind – most of which you can now do on your own, in your own home, *inexpensively!* You can literally learn how to save your own brain!!
- What a “Memory Rescue” plan looks like and how to implement one for yourself and your loved ones.
- The science that PROVES you’re not stuck with the brain you have – plus the before-and-after *pictures* that show real people making huge recoveries!
- God’s “butter” and “candy” for the brain – and why you should eat these every day! (HINT: they’re sinfully delicious and really nourish and protect that brain)
- What do 700 baby seahorses have to do with your memory? *Everything!*
- Bottom Line: The most important things, and the least important things that will help you *regain your brain, and change your life!*

Dr. Amen, M.D. is the Founder and Medical Director of the Amen Clinics, and the best-selling author of *Memory Rescue* and 30 other books. A distinguished fellow

of the American Psychiatric Association and double board-certified psychiatrist and clinical neuroscientist, Dr. Amen has amassed the world's largest database of SPECT brain scans.

If you have trouble sleeping at night or don't feel like you're getting the most out of your activities during the day, then this is **a must-see for you.**

[Click HERE to Watch Episode 4!](#)

What most of us do when we're trying to sleep better or improve our daytime energy and production is to learn about *what* to do, or *how* to do it...

But nobody's telling you **WHEN** to do it!

Why is "when" so important?

Because everyone has a little different clock they run day and night by. It turns out that **there are 3 or 4 different wake/sleep rhythms across the population**, and it's really advantageous to know which one you are.

You see... depending on your particular rhythm, **there are actually specific times according to your biological clock when you're better at it.**

Identifying YOUR particular rhythm and you can do just about anything better, faster, and easier... and you'll definitely remember more.

Once you know what your rhythm is, you'll have the advantage of knowing when it's **best for you and your brain** to schedule your activities... whether it's read a book... get new information... have a cup of coffee... go for a run... have some mental clarity... be creative... sell... buy.

Hi Name,

Today's *Regain Your Brain* episode is one you should definitely see and here's why...

It's been discovered is that **25% of the population is susceptible to "Airborne Alzheimer's."** Millions don't realize this, but you may be *breathing dangerous particles*

*that are erasing your mind right in your own home or office!*

It's literally as if you're "**Inhaling Alzheimer's!**"

You can't see them, but these **biotoxins** are all around you. Some pass through your brain and don't do much, but others can do serious harm, and the sooner you clear them out, the less damage they will do to your brain.

### **"Your Toxic Brain: How to Test For and Treat the Metals, Molds, and Toxins Erasing Your Memory"**

If you're exposed to dangerous toxins, **you often won't know it**. Left unnoticed and untreated, many of these toxins will almost certainly cause serious brain disorders, including Alzheimer's, so a home investigation should definitely be part of your brain health checklist.

In this episode, Dr. Mary Kay Ross, M.D. will reveal:

- How **biotoxins** can cause "Inhalation Alzheimer's" right in your own home...
- The **most common** household and environmental toxins, and how they can affect your brain and memory.
- How to **test** for toxins and most importantly...
- How to **clear out** memory-destroying toxins from your house and your brain.

If you think this just happens to a few people, that's actually not the case. A quarter of the population has a **genetic predisposition to toxic susceptibility and thus Inhalation Alzheimer's**. By all standards 25% is a large group of people, and most don't even know they're a moving target for this type of **brain poisoning!**

And here's the thing... How many doctors do you think know about **inhalational Alzheimer's**? What are your chances of going to your local physician, neurologist, whatever, and having them say, "*That's inhalational Alzheimer's.*"

According to Dr. Ross, "Probably not very many."

That means that YOU need to learn what this is and how to protect yourself... So make sure you watch Dr. Mary Kay Ross' episode **RIGHT NOW**, *before it expires at 9:00 a.m. tomorrow.*

Subject line: Episode 6 - What you must know about memory loss...

Subject line: Personalized care for your brain - Must-see Episode 6!

Hi Name,

Most of us can *feel* some memory “slipping” as we get older, but often we don’t know causing it or what to do about it...

Today we know that it takes a very personalized approach to care for your brain and address all the factors that cause memory loss.

So to help you look at your memory from just about every angle and systematically improve your thinking and brain health, please welcome *Regain Your Brain* expert is Dr. Pamela Wartian Smith, M.D.

[Click Here to Watch Episode 6!](#)

**“What You Must Know About Memory Loss, and How to Stop It”**

Dr. Pamela Wartian Smith, M.D., M.P.H. is the author of *What You Must Know About Memory Loss and How You Can Stop It*. She’s also the Director of the Center for Personalized Medicine and is a well-known authority on wellness and anti-aging.

**Memory loss really is a multifactorial problem**, and it requires that we look at each of these factors in a very customized approach. By contrast, many times we see doctors only treating symptoms, and **not running even the most basic tests to go deeper into finding out what's *causing* these symptoms.**

So to help you look at root causes of memory loss you might be experiencing, Dr. Smith is going to cover different tests you can ask your doctor for, and many are covered by insurance. And she's going to give you the range you need to be in for important brain health markers, which is often different than what a primary care doctor might tell you is "normal."

Subject line: Stress and your brain [Episode 8 is LIVE!]

Subject line: Episode 8: How to heal an overwhelmed overstressed brain...

Subject line: If you're overstressed, it's killing your brain, please watch Episode 8

Subject line: Day 8 - Specific steps that obviate stress that's damaging your brain

Hi Name,

I have an **extremely important episode** for you today. I can't think of a single person who wouldn't benefit from watching the *Regain Your Brain* interview with Dr. Joseph Maroon, M.D., especially if you're a caregiver, or in *any situation* where you're under a lot of stress...

[Click Here to Watch Episode 8!](#)

**“Overwhelmed, Overworked, and Overstressed: Preserving the Body & Mind”**

Dr. Maroon is a world-renowned neurosurgeon who truly understands the effects of stress on the brain and body... and what he is going to tell you is **very important – and very scary**...

You’ll discover that when you are under extreme stress for long periods of time, *it’s as if your brain is being murdered*... and you need to know why and how to stop it as soon as possible.

This is a MUST-SEE interview for anyone who has a lot of stress in their life. Science has revealed that **stressful overstimulation will result in the death of brain cells**, particularly in an area of the brain called the "hippocampus," which processes memory.

Please, if you are an **overstressed caregiver**... or a struggling parent... or you have a child with a handicap or other major issue... or perhaps your work or your relationships are causing significant stress... please **watch this episode RIGHT NOW and take notes**.

Dr. Maroon will give you **very specific steps that obviate your stress**, before it becomes even more disruptive in your life and more damaging to your brain, including:

Dr. Joseph Maroon, a world-renowned neurosurgeon, is going to teach you about the effects of stress on your brain, and give you **practical everyday techniques to de-stress your brain and your body, plus reveal**:

- The difference between Distress – D-I-S – and eustress – E-U stress (good stress and bad stress).
- What controlled and uncontrolled stress looks like, and how to **create more control** over the stress in your life.
- What *really* happens in your brain (and body) during a high-stress crisis!
- How the stress of the mother actually gets conveyed *in utero* – in the womb – to the brain of the child.
- Ways of coping with stress that are very healthy – without pharmaceutical drugs.

- The **anti-stress supplements** that reduce the negative effects of a stressful life, especially if your diet isn't all that great either.
- The single most effective **antidepressant** - *it's cheap and 100% natural!*

Dr. Joseph Maroon, a world-renowned neurosurgeon, the Medical Director of World Wrestling Entertainment and also of the Pittsburgh Steelers, so he certainly knows about brain injury, and how to heal the brain.

In addition Dr. Maroon is an Ironman athlete, and an expert in nutrition, which is not typical of surgeons. He has **deep insight into burnout, extreme stress**, *because he's lived it.*

Dr. Fossel is at the forefront of an Alzheimer's revolution. He's developed a **completely new approach** that he thinks will reverse, and even **outright cure Alzheimer's in people** – not just mice – *in just a few years*.

Not only that... Dr. Fossel believes that this same approach can be used to **reverse all diseases of aging...** from arthritis, to osteoporosis, to Parkinson's, to macular degeneration -- on and on and on.

Dr. Fossel M.D., Ph.D. is regarded as the **world's foremost expert** on clinical use of *telomerase* for age-related diseases. He is the founder of Rejuvenation Research and author of *The Telomerase Revolution*, which was selected by *The Wall Street Journal* as one of 2015's best science books. Dr. Fossel earned his M.D. and Ph.D. in Neurobiology from Stanford University and is a **extremely respected** lecturer around the world.

Even though Dr. Fossel is at the top of his field, this massive breakthrough hasn't come easy. Dr. Fossel has been working for over 20 years to unlock a **reliable mechanism** that can return a dysfunctional brain to normal... and in doing so he may have also found *the answer to reverse all degenerative diseases!*

Subject line: Your Immortal Brain - Watch Episode 12!

Subject line: Watch Episode 12 - Your Immortal Brain...

Hi Name,

Today I'm showing the final episode in the *Regain Your Brain* event and I highly recommend you make time to see this phenomenal doctor interview...

You'll meet Dr. Michael Fossel, M.D., Ph.D. (Stanford University), and Neurobiologist who will explain the science behind **The Immortal Brain** – made possible by a new **technology that restores the brain back to a healthier, disease-free state...**

Think of it like a “**brain reset**” – where we're able to **reset the cells to act more like younger cells again**. And it could be as simple as going to a doctor's office to get a simple injection whenever a person feels their memory slipping.

Sounds like science fiction but it's not. It's the **MAGIC** of telomerase technology and its potential to repair both genetic and man-made dysfunction in the brain may be just around the corner...

[Click Here to Watch Episode 12!](#)

***“The Immortal Brain: New Frontiers in Genetic Expression”***

Specifically Dr. Fossil will reveal:

- The new technology that demonstrates how we can both prevent and cure Alzheimer's disease...
- Where in the brain it's now possible to get dysfunctional cells to start doing their job right again, to clean up “cellular garbage” just as your young cells were able to do...
- What's taking place between now and the next 2-3 years that could give people a viable way to treat most if not all degenerative diseases, including Alzheimer's...
- What the possible cure for Alzheimer's actually looks like, how does it work and how would people get this unique treatment...
- How it could get a whole lot less expensive to treat mild to moderate Alzheimer's disease, which is usually an extraordinarily expensive condition to treat...

Dr. Fossel wrote the definitive textbook on cellular aging, and is regarded as **the world's foremost expert on clinical use of telomerase for age-related diseases**. You may have heard of telomeres and telomerase, but you're going to hear a lot more today about their revolutionary potential for arthritis, Alzheimer's – and really ALL age-related diseases.

Seeing Dr. Fossel's interview will give you **NEW HOPE** if you or someone you love is fighting Alzheimer's. So far, the world of Alzheimer's has been filled with gloom and doom, and so many failed efforts and dead ends... but Dr. Fossel feels exactly the opposite... because **the science of telomeres changes everything...**

***“The Immortal Brain: New Frontiers in Genetic Expression”***

Specifically Dr. Fossil will reveal:

- The new technology that demonstrates how we can both prevent and cure Alzheimer's disease.
- Where in the brain it's now possible to get dysfunctional cells to start doing their job right again... to clean up “cellular garbage” just as your young cells were able to do.
- What's taking place between now and the next 2-3 years that could give people a viable way to treat most if not all degenerative diseases, including Alzheimer's.
- What the possible cure for Alzheimer's actually looks like, how does it work and how would people get this unique treatment.
- How it could get a whole lot less expensive to treat mild to moderate Alzheimer's disease, which is usually an extraordinarily expensive condition to treat.
