Test Subject line 6: Breast Cancer and what can now be the outcome...

Dear First Name,

I have a heart-wrenching breast cancer story to tell you with an outcome that's **unheard of these days.**

In 2005, Shannon Knight found a lump under her left breast and of course it scared her.

She went to her doctor who felt the lump he said, “Well, you have cystic breasts.”

Shannon was worried sick. “No,” she said, “This is different. This one is getting bigger and it’s harder.”

TRUE STORY ... Can you believe that her doctor actually said, “Well, I think your concern is a little bit too much. You do not need to be worrying about this.”

The lesson?

You wouldn't believe how many doctors misdiagnose breast cancer, and spend so much precious time mistreating cancer ... and then it's too late. It's the main reasons so many women are dying of breast cancer today.

Her doctor gave Shannon a bag with a bunch of stuff in it ... support groups pamphlets and pink ribbons on everything.

And when she got through a very painful mastectomy, that's when doctors told her it had gotten into her lymph nodes. Her cancer was now Stage 3. Later, Shannon told me she wishes she never got that mastectomy, and more importantly, why...

By the time her doctor wasted so much time with chemo and surgery that was making her condition so much worse, Shannon was to the point where she was given only months to live. Stage 4 cancer was scary. Her family was preparing for her to die. Her kids were crying and calling her scared, especially her daughter.

What could she do?!

Long story short ... **What would normally be a death sentence took an AMAZING turn** when Shannon took matter into her own hands. She was lucky to find a doctor who is a **pioneer in treating breast cancer (and other cancers) 100% naturally, and with far better results.**

This was a different kind of doctor ... one who saw cancer differently, and began treating Shannon with a **powerful combinations of natural treatments** including ... are you ready?

High dose vitamin C, intravenous.

Laetrile intravenous.

Ozone therapy.

Dendritic cell therapy (Dendritic cell **cancer vaccine** made with your own blood)

Hyperthermia.

Hyperbaric chamber.

Ever heard of these? Almost no one has!

Shannon's new doctor only gave her treatments that would boost her immune system in a BIG way, along with her thymus gland.

**And the RESULT? IT WORKED!** Shannon is alive and well now 6 years later (and counting).

She got her treatment in February of 2011 and by August was symptom-free. In October **her PET scan confirmed she was 100% cancer-free.**

Not your typical outcome with Stage 3 breast cancer, right?

Shannon's kids definitely BELIEVE now, which makes her feel good because she wants them to know **there is another way ... a BETTER way. This is not a time you have to be afraid of cancer.**

I hope YOU will learn how you and your family do not have to fear cancer anymore either.

Learn everything Shannon did and more.
