## ACT 2

1

Meet Dr. Theodore Diktaban...

He's a double Board Certified, world-renowned surgeon and anti-aging expert who's constantly featured in *The New York Times* as one of New York's top "Super Doctors."

He's performed thousands of procedures over the last 30 years to help people look younger, happier, and more confident on the outside...

Problem was... his patients were complaining about how tired and crappy they felt *on the inside*.

So he started researching clinical studies, and discovered that 80% of the population is walking around with the same complaints.

And most of them have been given information by so-called medical experts that's VERY misleading.

Like being told that feeling tired or fatigued is just a natural part of getting older.

Not so, says Dr. Theo, and he's here to prove it.

Fatigue is definitely NOT tied to your age... and neither is feeling more tired the older you get.

	<p>Another piece of bad advice is health gurus telling you to simply eat “healthier” everyday and you’ll feel better.. <del>and exercise or move around more.</del></p> <p>Well, Dr. Theo’s research proved there are certain foods marketed as "healthy" that can actually do serious damage to your energy levels, AND your overall health.</p>	
3	<p>Dr. Theo got fed up with all the bad information, and made it his mission to share his research... so that everyone could get the truth and use it to revive their own energy and health.</p> <p>Today YOU can join thousands of others who've already watched Dr. Theo's presentation and no longer suffer the life-draining effects of fatigue, exhaustion and just being flat out tired all the time.</p> <p>Just click the link and watch, and pay close attention as Dr. Theo explains why – if you want to feel incredibly energized and healthy every single day – then you MUST...</p> <p>Avoid the 3 foods that cause people to feel tired, even though you've been told they are healthy.</p> <p>While at the same time, add Dr. Theo's top 4 Anti-Fatigue foods that can easily be worked into your everyday meals.</p>	Footage that shows Dr. Theo talking to an audience on stage?

	<p>And most importantly, when you're battling fatigue, feel sluggish, and it's been hard to lose weight... Dr. Theo explains why you HAVE TO get this one special food into your diet and nighttime routine...</p> <p>It is BY FAR the single most important missing piece that your body MUST HAVE to produce the ENERGY it's not currently giving you!</p> <p>Follow Dr. Theo's unique combination of simple do's and don'ts, and it will be much easier for your body and mind to stay <i>naturally energized</i> all day, everyday.</p> <p>Plus, you'll be giving yourself an all-over health upgrade.</p>

### ACT 3

1	<p>Now, if you're someone who's willing to accept that fatigue or feeling tired even just a little on a lot of days, is just a natural part of getting older...</p> <p>OR you think that eating healthier is all you have to do to solve your energy and weight gain problems...</p> <p>Then please feel free to skip Dr. Theo's presentation.</p>	
2	<p>But, if you want answers and information on how you can unlock and untap your body's endless natural energy reserve, no matter how old you are...</p> <p>If you're ready to say goodbye to your tired days, and wake up every morning refreshed, with an <i>insane</i> amount of energy everyday!</p>	
3	<p>Then Click the link and watch Dr. Theo's free presentation right now.</p>
